Major Changes for NIH Grantseekers
JAN 30

In early 2025, NIH will be implementing multiple changes to the review process. In this session, we will cover the key considerations for faculty planning to submit to NIH after January 2025, including the simplified review process for most research project grants, changes to the fellowship application, and more.

Keys to a Competitive NSF CAREER Proposal
FEB 27

The National Science Foundation's CAREER program continues to be a key opportunity for early career scientists. In this webinar, we will identify the core elements of a strong NSF CAREER proposal, diving into when to apply, how to frame intellectual merit and broader impacts, and common missteps faculty make that decreases chances of funding.

Artificial Intelligence Policies among Federal Grantmakers
MAR 27

The utilization of artificial intelligence in grant proposals has created a shake up in the federal grantseeking landscape. Many federal funders have issued policies to encourage the appropriate use of AI, or limit its usage in federal proposals. This session will cover those major federal policies, enabling faculty to ensure compliance with new guidance on the use of AI.

Facilitating Stakeholder Engagement in Grant Development
APR 24

For many large-scale grants, funders are aiming to foster cross-sector and community engagement to maximize the impact of their awards and solve complex challenges. This webinar will review key considerations and best practices for engaging partners and stakeholders in the grant development process to ensure that impact is realized.

### Strategies for Successful Interdisciplinary Collaboration
MAY 29

Contributions from partners, stakeholders, and collaborators are often central to the success of a grant application because they can provide the vital expertise, buy-in, and resources needed to effectively execute your project. In this session we will review profiles of different key collaborators in the grant development process, looking at what they bring to the table and how you can best draw them into your orbit.

Know Your Funder: Advanced Research Projects Agency for Health (ARPA-H)
JUN 26

A relatively new agency at NIH, ARPA-H is a research agency supporting transformative work in biomedical and healthcare fields. This webinar will provide an overview of ARAP-H, including how the agency differs from NIH's other Institutes and Centers, how grants are made, and key considerations for competitiveness.

Storytelling in Grant Writing, Part II: The Plot Thickens
JUL 31

Back by popular demand, this sequel will dive deeper into the art of storytelling as it relates to the grant writing process, providing targeted strategies for enhancing your proposals by leveraging narrative frameworks and storytelling concepts to capture the imagination of your grant's reviewers.

Advanced Strategies for Enhancing Your Proposal Narrative
AUG 28

In this webinar, we will explore advanced strategies for developing a strong grant narrative, including how to imagine the reviewer while writing a proposal, how to identify the early elements of the proposal that are most important, and how to create a meta narrative to help reviewers identify key points in the proposal.

Deciphering Feedback from Grant Reviewers
SEP 25

Resubmitting is a large part of the grantseeking process, and interpreting and strategizing feedback from grant reviewers is a critical component to resubmission success. In this session, we'll look at the common elements of the feedback process with federal reviewers, including how to weigh the feedback, how to respond, and when to decide if a resubmission is the right choice.

Engaging Non-Specialist Audiences in Grant Writing
OCT 30

Grant proposals are often sophisticated, scientifically rich documents. However, review panels frequently include non-specialists. This session will dive into how best to engage non-specialist audiences in grant proposals, allowing researchers to communicate the importance of the work without alienating non-subject matter experts.

Developing Competitive NSF Proposals
NOV 20

What makes a strong National Science Foundation proposal? How can you make your NSF proposal stand out, and set yourself up for success? Here we will cover tips to drive success in your proposal, from early Program Officer engagement, proposal timing, and core elements of a strong NSF submission.

Cultivating Relationships with Foundations
DEC 18

Unlike most federal grantmakers, foundations can be mysterious and opaque – from the guidelines they publish to the decision-making process. For these reasons, cultivating relationships, and nurturing those relationships with foundation funders is paramount. In this session, we'll cover strategies and engagement practices to successfully develop partnerships with foundation funders.
